Sterilon

200ml

To prepare weekly solution:

1. Fill an appropriate non-metal container with 4 litres of cold tap water.
2. Add 50ml of **Sterilon** sterilising solution using the dosing cup supplied or the dose indicator on the side of the bottle. (A dilution of 12.5ml per litre of water equals 50ml/4litres water)
3. A fresh solution should be made up every 7 days on the same day of the week.
4. Clean babies bottles and teats thoroughly in warm water and turn teats inside out and rub with salt.
5. Rinse thoroughly and submerge completely in **Sterilon** sterilising solution.
6. Minimum immersion time is 10 minutes.
7. **DO NOT** rinse in tap water after sterilising, merely shake off.

Precautions:

Store in a cool place out of direct sunlight. Do not mix with any other incompatible substances. Avoid contact with the eyes. In case of eye contact, rinse well with water and, if necessary, seek medical attention. If ingested, drink lots of water and seek medical attention. The efficacy of the disinfectant could be compromised if the surfaces are soiled.

Warnings:

Not to be swallowed.
Keep out of reach of children.
Avoid contact with fabrics.

Sterilon

200ml

Unique:

This unique sterilising fluid kills thrush.

Convenient:

One dose lasts seven days.

Safe:

A broad spectrum steriliser that kills harmful germs such as E. coli, S. aureus and C. albicans.

Change your sterilising solution only once a week.

Sterilon destroys harmful bacteria which develop in milk, as well as Candida albicans, the organism that causes thrush. It leaves bottles, teats, dummies and breast pumps safe for your baby.

Sales Permit No.: 102/2009
