

Palmshave[®]
QUALITY SHAVING BRUSH

Care of your shaving brush

Rinse with soap and water under hot tap, before initial use. When lathering, avoid scrubbing action and excessive pressure. Rinse thoroughly after use, shake to remove all excess water and flip top of brush with fingers to allow air to circulate.

Important: Leave the brush in the open air to dry. To avoid damaging the brush do not store in a container or enclosed space.

Hoe om u skeerkwas te versorg

Was met seep en warm kraanwater voor gebruik. Wanneer u skeerskuim aansit, vermy skropaksie en oormatige druk. Spoel af na gebruik, skud om oortollige water te verwyder en kam punte van kwas met u vingers om lug te laat sirkuleer.

Belangrik: Laat die kwas oop om droog te word. Om beskadiging van kwas te voorkom, moenie in 'n houër of toe plaas staan nie.
